PROFESSIONAL SUMMARY

I am a Full Stack developer who turns requirements into software that runs in production. I work in JavaScript, TypeScript and Python, build web and mobile products with React, Next.js, Node.js and Flutter, and ship them on AWS, Google Cloud and Firebase. Today I maintain, test and extend MIGOZZ, a live social platform on Android, iOS and the web. Before that I was an SAP / SAP Fiori development apprentice at Mitsubishi Electric de Colombia. My projects range from a generative AI assistant on AWS to local commerce and a real-time multiplayer game.

WORK EXPERIENCE

Full Stack Developer
Sep 2026 - Present

MIGOZZ | Startup, Colombia

- I keep a live social platform for creators, brands and artists stable on Android, iOS and the web.
- I test every new feature and run regression checks before each release, so bugs do not reach users.
- I build features end to end in the Flutter app and the Firebase backend, with Cloud Functions and Stripe payments.
- I fix issues and ship the corrections through pull requests with code review.

  Technologies: Flutter, Dart, Firebase, Cloud Functions, Stripe

IT Apprentice, SAP / SAP Fiori Development
Jan 2026 - Jul 2026

Mitsubishi Electric de Colombia | Bello, Colombia

- I built and maintained OData services and SAP Fiori / SAPUI5 apps within the SAP team.
- I diagnosed and fixed incidents in SAP features and services, and validated every fix with functional tests before it went to production.

  Technologies: SAP Fiori, SAPUI5, OData, JavaScript

EDUCATION

Technologist in Software Analysis and Development
Sep 2026

SENA (Servicio Nacional de Aprendizaje) | Caucasia, Antioquia, Colombia

Systems Technician
Nov 2023

SENA (Servicio Nacional de Aprendizaje) | Caucasia, Antioquia, Colombia

Academic High School Diploma (Bachiller Académico)
Dec 2023

Institución Educativa Santo Domingo | Caucasia, Antioquia, Colombia

TECHNICAL SKILLS

Web: TypeScript, JavaScript, React, Next.js, Tailwind CSS, HTML, CSS
Backend: Node.js, Express, Python, PostgreSQL, MongoDB, REST APIs
Mobile: Flutter, Dart, Firebase (Firestore, Auth, Cloud Functions), Stripe
Cloud and DevOps: AWS (Lambda, API Gateway), Google Cloud, Docker, Git, GitHub Actions, CI/CD, Linux
Testing: QA testing, regression testing, functional testing
Also worked with: SAP Fiori, SAPUI5, OData, Amazon Bedrock, Supabase, MySQL, Sass, Make, Unity, C#, C++, Arduino
Languages: Spanish (native); English (SENA English Does Work, Levels 1 and 2)

SELECTED PROJECTS

ARIA | Client: Arix Group
On a five-person team, I built the React chat interface with live answers and a sources panel, a FastAPI test API and the batch pipeline of a generative AI assistant for SAP support (Amazon Bedrock and RAG on S3 Vectors, on serverless AWS). The system answers in 5.9 s, down from 16.7 s in the first design.
Technologies: React, TypeScript, Python, FastAPI, Bedrock, S3 Vectors, AWS Lambda

Hecho en Sabaneta
I developed a local commerce platform with a business directory, catalog, shopping cart and municipal events. Delivered to the client.
Technologies: TypeScript, Next.js, Firebase, Google Cloud

Arcoiris Zapatería
I developed the website of a family workshop in Medellín: a catalog of 50+ services, a before/after gallery and a guided diagnosis that ends in WhatsApp. arcoiriszapateria.com
Technologies: TypeScript, Next.js, Firebase, Google Cloud

SENA Cloud | Client: SENA, institutional project built during my training
I built an academic and administrative management platform with several user roles and permission control, used by instructors and administrators. senacloud.netlify.app
Technologies: TypeScript, React, MongoDB, Tailwind CSS

SensoresAPP | Client: SENA, institutional project built during my training
I designed a flood early-warning prototype with water-level sensors for nearby communities.
Technologies: Arduino, C++, IoT

CashWin | Client: Inversiones Amazónica S.A.S.
I programmed a real-time multiplayer dice game with integrated payments.
Technologies: Unity, C#, Photon PUN 2, MercadoPago

TRAINING AND CERTIFICATIONS

- Software Testing (SENA, Oct 2025, 48 hours)
- Exploratory Data Analysis with Python (SENA, May 2024, 48 hours)
- Data Cleaning and Transformation with Python (SENA, Sep 2024, 48 hours)
- English Does Work, Level 1 (SENA, Nov 2024, 48 hours)
- English Does Work, Level 2 (SENA, Jul 2025, 48 hours)

AWARDS AND RECOGNITIONS

- Orgullo SENA 2024, Technical Performance (SENA Antioquia, 2024)
- Aprendiz Integral, Special Recognition (SENA, Complejo Tecnológico para la Gestión Agroempresarial, Sep 2023)
- Recognition for outstanding all-round professional training (SENA, Complejo Tecnológico para la Gestión Agroempresarial)
